EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Whitham on September 27, 2011.

The application has been amended as follows:

In the specification:

- Page 8, line 20, after "exhaust gas", delete "(10)".

In the claims:

1. (currently amended) A method for operating an exhaust gas purification system for exhaust gas which contains organosilicon compounds, comprising the steps of:

treating said exhaust gas in a regenerator with a heat storage material at least a portion of which is in the form of bulk material and which forms a bed, said treating step results in the formation of adhesions containing silica, formed by oxidation of organosilicon compounds, on said heat storage ~~material formed by oxidation of organosilicon compounds~~;

removing at least a portion of said heat storage material of said bed from said regenerator after adhesions are formed on said heat storage material from oxidation of said organosilicon compounds;

purifying the heat storage material removed from said regenerator by removing adhesions from said heat storage material; and

re-introducing the heat storage material purified in said purifying step into the regenerator to refill the bed ~~for retaining oxidation products of the organosilicon compounds in the form of adhesions on the heat storage material.~~

4. (currently amended) The method as claimed in claim 3, further comprising the step of flushing the regenerator ~~with intermediate storage of the exhaust gas.~~

5. (currently amended) The method as claimed in claim 1, wherein the ~~at least one~~ regenerator includes two or more regenerators each with beds which are connected to a combustion space, and through which flow takes place alternately between the ~~at least~~ two or more regenerators, and wherein each of said two or more regenerators are equipped with an apparatus for removal and re-introduction of the heat storage material after purification using a separation apparatus.

6. (currently amended) The method as claimed in claim 2, wherein said ~~at least one~~ regenerator includes two or more regenerators, and wherein performing said steps of

removing, purifying, and re-introducing the heat storage material is effected at successive times in individual regenerators of said two or more regenerators.

16. (currently amended) The method as claimed in claim 1, wherein the ~~at least one~~ regenerator includes two or more regenerators, each of which have a discharge connected to a separation apparatus.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: In Figure 1, the product coming out from separation apparatus "16" (right hand side of the drawing), should be " SiO_2 ", not " SO_2 ". In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest the use of a heat storage material at least a portion of which is in the form of bulk material and which forms a bed to purify an exhaust gas containing organosilicon compounds. The translation of JP 2002-061822 shows that the heat-accumulating member is "constructed by stacking the ceramic heat-accumulating member with a honeycomb structures in multiple stages, stacking ceramic or metal spherical heat-accumulating member to the prescribed height, or by cutting multiple ceramic or metal pipes to the prescribed length (note paragraph [0006], translation

pages 4-5). Since the heat-accumulating member in JP '822 does not form a bed, it cannot be removed and regenerated by the method disclosed in Ohlmeyer '567.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ngoc-Yen Nguyen whose telephone number is (571)272-1356. The examiner can normally be reached on Part time schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Emily Le can be reached on (571) 272-0903. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
